The time has come to rethink IT and reinvent business - with cloud computing

The world is changing. A new reality is emerging for organizations of every size from every part of the planet. Cloud computing reflects a profound evolution of IT with revolutionary implications for business and society, creating new possibilities and enabling more efficient, flexible and collaborative computing models.

Presented by

Olivier Gourdange,
Solution Representative,
IBM Global Technology Services

Organized by

Technology Managers.Lu (Tema.lu)
with the kind support of IBM
